EDUCATION

International Insitute of Information Technology

Pune, India

B.E. in Computer Engineering SGPA: 8.72/10

April 2021 - June 2024

Coursework: Algorithms and Data Structures, Data Science, Data Science & Visualization, Machine Learning, Natural Language Processing, Database Systems, Software Testing, Software Lifecycle, Problem Solving, OOPs, Computer networks, Web Technologies

TECHNICAL SKILLS

- Programming Languages & Databases : Python, C++, HTML/CSS, C#, JavaScript, SQL, MongoDB, Firebase
- Libraries & Frameworks: ReactJs, NextJs, Pandas, Flask, Plotly, ReactNative, ChartJs, Shadcn./UI, NodeJs, Expo, ExpressJs,
- Software: Visual Studio, Jupyter, Git, PuTTY, Google Analytics, PowerBI, Google Cloud, Docker, Postman, Linux, Figma

PROFESSIONAL WORK EXPERIENCE

IOFT (Institute of Futuristic Technologies)

Remote, Pune

SEO & Web Intern

March 2023 - April 2023

- Developed and refined the IOFT [website](#) with various Search Engine Optimization. Added new content and web pages for courses. Learned a lot about 3D models for the web and its functioning and updated site map. I also had professional work experience.

RELEVANT ACADEMIC PROJECTS

Chat-LECS (Firebase + Reactjs)

[Repo](#) | [App](#)

- A chat application that uses the [Linear Elliptic Curve Signaturing](#) method to sign and verify signed messages made using [Firebase](#) real-time database and authentication.

Neighborhood Evaluation & Scoring System (NESS)© (ReactJs + GoogleMapsApis + data analytics + flask)

[Repo](#)

- A system that uses data-driven analysis to provide insights into the quality of life in different areas/neighborhoods and Rank them.
 - (Awarded "Best GUI" trophy at "CONVENE 2k24" at SKNCOE Sinhgad Colleges, Pune)

Smart Scheduler (ReactJs + GoogleGenAI + GoogleCalenderAPI)

[Repo](#)

- Creates an optimal Schedule based on Todos and prescheduled events using AI and Google Calendar for optimal executions.

SoundScrapper (ReactJs + SpotifyApi + YoutubeApi + YTDL-Core)

[Repo](#)

- An Application to download Spotify Playlists music using Spotify & YouTube API which accesses your playlist songs and downloads the mp3 version of the song from YouTube.

Sort-Alyzer (C++ + Algorithms + OpenMP)

[Repo](#)

- An application that measures the actual time needed to sort arrays using single/multiple threads to test different sorting algorithms

ShootIt++ (C++ + SFML graphics [library](#))

[Repo](#)

- A Space shooter game made in C++, with custom graphics, and sound based in space where a spaceship shoots down randomly appearing asteroids which powers up the spaceship to shoot a special bullet that expands the game window.

Animephile (NextJs + Firebase + EmailJs)

[Repo](#)

- An anime episode tracker & reminder made with NextJs and Firebase backend, to notify users of new episodes with email

Genre Predictor (Python + SVM + Data Analytics)

[Repo](#)

- A Model Trained on movie scripts to predict the genre of a Movie based on the movie script or from a summary of the story.

Sleep State Analysis (Python + Gradient Boosted Classifier + Big Data + GraphJs)

[Repo](#)

- Made a gradient-boosted classifier for sleep onset and wake-up based on Human Limb Movement based on the angle and speed of movement of a limb.

Job Portal (MERN, ReactJs + MongoDB + ExpressJs + NodeJs)

[Repo](#)

- Worked with Group of 4 to develop a Job portal and developed user login and dashboard for recruiters to post jobs and internships

Git Kitty (Chrome Extension + GithubAPI + Google [Emoji Kitchen](#))

[Repo](#)

- A Chrome extension that checks for repository commits and responds with different moods based on the status of daily commits.

Dynamic Traffic Light System (IoT + Arduino)

[Repo](#)

- An IoT-based project to detect Traffic and dynamically change the green light timings for optimal traffic flow at intersections.

Cordova Weather Android App (Cordova + Open Weather [API](#))

[Repo](#)

- Weather Android Application made using weather.com API and Cordova platform for Android with a dashboard and to-do list feature.

CERTIFICATION & EXTRACURRICULAR ACTIVITIES

- CESA Web Master - developed a [website](#) for the Computer Engineering Student Assoc. showcasing various events & members.
- [Won Spree](#) of Coding and [Mickey Virus](#) i.e. Hackathons/Coding competitions held at the college level, 1st among 100 students.
- FreeCodeCamp certifications in Web, front-end libraries, & [C#](#) with projects developed for each course. ([web cert](#))([front-end cert](#)).
- Created a project for the [FinHack](#) Hackathon. Engi. entrances result in percentile - [93](#) in JEE-Mains, [95](#) in MHT-CET, [90](#) in GATE,
- NSS I2IT Member, Attends Global Hack Weeks by Major League Hacking, Open Street Map Contributor, occasionally plays soccer.
